# Reimagine Reporting with Automation

Qlik Reporting Service

Need to get more Qlik Sense® analytics insights to more of your employees and business partners fast? Qlik® Reporting Service is optimally used as a business process automation you can count on to transform how you connect and share Qlik application insights with others you trust.

Connect and Extend Your Analytics Value

Your employees and people working in your partner circle need the broader business outlook that only reports can provide. Yet too many teams are inundated with data and IT organizations are struggling to keep up with requests for access to more frequent, even daily reports. Qlik Reporting Service is the answer to staying aligned and improving decision making. It offers a new way of distributing reports via business process automation so as your Qlik application data and reporting needs grow, team frustration doesn't.

Our automation empowers your IT organization to quickly assemble, automate and accelerate report distribution. It delivers through a wide variety of channels, sending information the way you direct it – to recipients inside and outside of your organization. Because we automate all the reporting distribution work, you can effortlessly expand your Qlik analytics reach while cutting out repetitive programming tasks. And that frees your staff resources for higher-value assignments.

Our Qlik Reporting Service upends traditional reporting composition and delivery protocols. For example, through a Reporting Service API, it gives your centralized or shared services IT people a groundbreaking way to deliver, or burst, multi-page reports as PDFs from Qlik Sense® applications for multi-channel delivery. And our Qlik innovation isn't stopping there as we continue to empower more people with data and analytic insights.

Qlik Reporting Service gives you rapid time-to-value benefits
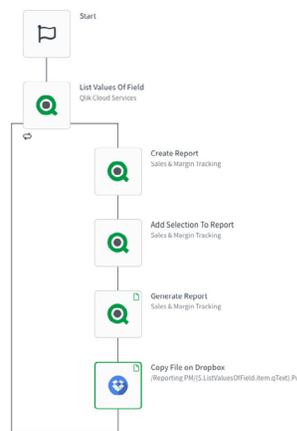

Save Time: Automate Report Tasks

Quickly assemble, automate and accelerate the distribution of different reports for a variety of people and across organizations. Take advantage of templates to ensure consistency. Improve productivity and speed time to value, not only meeting but exceeding reporting requirements.
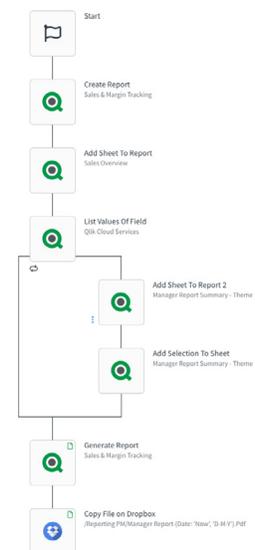

1 Easily create report definitions

2 Reports delivered to channel

3 Cycled Report - All Sheets

4 Global Manager Report - Levelled Sheet

Strengthen Connections: Deliver PDF Reports

Simply deliver reports via email to anyone in your recipient stream. Or deliver reports to cloud storage connectors such as Google Cloud, Dropbox, Amazon S3 and others, to strengthen your business connections.

Extend Your Analytics Reach: Access the Reporting Service reach:

Whether your people already use Qlik or not, expand your Qlik Sense analytical insights across your enterprise and beyond. Use the Reporting Service to schedule or trigger a cadence of Qlik Sense insights to your employees and people working across your business eco-system – partners, suppliers, agents, and others – through a portal to extend your analytics reach.

Quickly Get Started

The Reporting Service public API supports Qlik Sense capabilities, bursting report options, multiple distribution channels and more:

- Qlik Sense charts and sheets PDF outputs

- Composition with a 50-page maximum PDF

- With Selections per object

- Configurations, including export size, orientation, zoom, DPI, themes and soft properties

- Two options for bursting reports

- Work programmatically with the Reporting Service API on a system integration (requires professional developer skills)

- Work with Qlik Application Automation to leverage starter blocks and templates (no-code/low code environment with frequent releases is easily configurable and supports many file delivery channels)

- A variety of recipient distribution channels including the following:

Amazon S3	**FTP**	**Dropbox**
Google Cloud Storage	**SMTP Mail**	**Sharepoint**

Qlik Reporting Service, in delivering report task automation, leverages Qlik Application Automation's time to value features including the following:

• Low code/no code environment

• New report blocks released frequently

• Enhanced email block for email report distribution

• Recipient lists that can be pulled from connected sources

• Distribute to connected channels that support file delivery

• Easily configure triggers (schedule, reload, API, etc.)
