

## Shining a light on accounting and ERP data

Qlik Sense Enterprise SaaS unlocks insights from Exact ERP systems

### Challenge

Dataspark specializes in data visualization, dashboards and reporting specifically for Exact Online, Exact Globe and Exact Synergy. Dataspark wanted to empower Exact Software users to get even more insights from their data. To achieve this they needed to build bespoke products and become the go to services organization for their customers.

### Solution

After reviewing PowerBI, Qlik and Tableau, Dataspark chose Qlik Sense Enterprise SaaS for its flexibility, easy accessibility and speed that their customers demand. Dataspark builds the Qlik apps to unlock Exact data and makes these available for customers to drill down, explore and get valuable data insights to help their business thrive.

### Results

When Dataspark builds a new customized Qlik App, the customer immediately gets what they need out of their Exact solutions. The average delivery and go-live time is an amazing 2-3 days, including making the apps available via mobile and tablets. One of their customer's comments said, "It's almost like a thick fog has entirely cleared. We now have full data insight."

### Solution Overview

#### Customer Name

Dataspark

#### Industry

High Tech

#### Geography

Netherlands, EMEA

#### Function

Finance, Sales and Logistics

#### Business Value Driver

Customer Intelligence,  
Reimagined Processes

"We were able to build our first Qlik Sense dashboard within an hour. We sent it to one of our customers and they were so impressed, they wanted to buy it immediately. We have never stopped since and are ever expanding our own and our customer's business with Qlik Sense Enterprise SaaS."  
Harm Snaphaan, CEO
